Chapter 11 Inheritance and Polymorphism

Program # 1 (Exercise 11.3 p.445 Subclasses of Account)

In Programming Exercise 9.7, the Account class was defined to model a bank account. An account has the properties account id, balance, annualInterestRate, and dateCreated, and methods to deposit and withdraw funds.

Create two subclasses for checking and saving accounts. A checking account has an overdraft limit, but a savings account cannot be overdrawn.

Draw the UML diagram for the classes and then implement them. Write a test program that creates objects of Account, SavingsAccount, and CheckingAccount and invokes their toString() methods.

```
Checking Account
Overdraft Limit: 5000.00
Balance is 5000.00
Withdraw: 10000.00
Balance is -5000.00
This account was created at Sun Mar 07 21:48:27 ICT 2021
```

Program # 2 (Exercise 11.8 p.446 New Account class)

An Account class was specified in Programming Exercise 9.7. Design a new Account class as follows:

- Add a new data field name of the String type to store the name of the customer.
- Add a new constructor that constructs an account with the specified name, id, and balance.
- Add a new data field named transactions whose type is ArrayList that stores the transaction for the accounts. Each transaction is an instance of the Transaction class. The Transaction class is defined as shown in Figure 11.6.

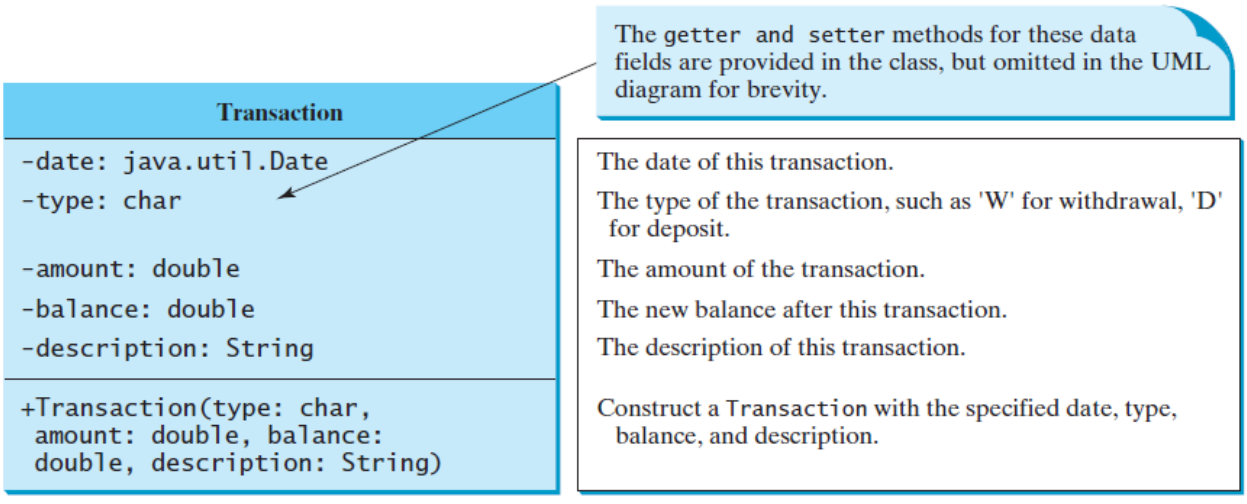

FIGURE 11.6 The Transaction class describes a transaction for a bank account.

- Modify the withdraw and deposit methods to add a transaction to the transactions array list.
- All other properties and methods are the same as in Programming Exercise 9.7.

Write a test program that creates an Account with annual interest rate 1.5%, balance 1000, id 1122, and name George. Deposit $30, $40, and $50 to the account and withdraw $5, $4, and $2 from the account. Print an account summary that shows account holder name, interest rate, balance, and all transactions.

```
Name: George
Account ID: 1122
Annual interest rate: 1.65
Balance: 1109.00
Date                              Type            Amount          Balance
Sun Mar 07 20:47:59 ICT 2021      D               30.00           1030.00
Sun Mar 07 20:47:59 ICT 2021      D               40.00           1070.00
Sun Mar 07 20:47:59 ICT 2021      D               50.00           1120.00
Sun Mar 07 20:47:59 ICT 2021      W               5.00            1115.00
Sun Mar 07 20:47:59 ICT 2021      W               4.00            1111.00
Sun Mar 07 20:47:59 ICT 2021      W               2.00            1109.00
```

Program # 3 (Exercise 11.2 p.445 The Person, Student, Employee, Faculty, and Staff classes)

Design a class named Person and its two subclasses named Student and Employee. Make Faculty and Staff subclasses of Employee.

- A person has a name, address, phone number, and email address.
- A student has a class status (freshman, sophomore, junior, or senior). Define the status as a constant.
- An employee has an office, salary, and date hired. Use ~~the MyDate class defined in Programming Exercise 10.14~~ to create an object for date hired.
- A faculty member has office hours and a rank.
- A staff member has a title.
- Override the toString method in each class to display the class name and the person's name.

Draw the UML diagram for the classes and implement them. Write a test program that creates a Person, Student, Employee, Faculty, and Staff, and invokes their toString() methods.

ตัวอย่างการใช้คลาสเกี่ยวกับปฏิทิน

```
Date d = new Date();
System.out.println(d.getTime());
GregorianCalendar gc = new GregorianCalendar(1998, 2, 1);
System.out.print(gc.get(Calendar.YEAR) + "-"
                 + gc.get(Calendar.MONTH) + "-" + gc.get(Calendar.DATE));
System.out.println();
LocalDate ld = LocalDate.of(1988, Month.FEBRUARY, 1);
System.out.println(ld);
LocalDateTime ldt = LocalDateTime.of(1978, Month.MARCH, 1, 14, 58);
System.out.println(ldt);
```
